

## JOB DESCRIPTION

<b>DESIGNATION/ TITLE:</b>	Senior Full Stack Developer with DevOps Experience
<b>REPORTING TO</b>	Head - Engineering
<b>NUMBER OF REPORTS</b>	Individual Contributor role (6 months contract role)
<b>LOCATION</b>	Remote
<b>OBJECTIVE</b>	As a Full Stack Developer, you will develop applications in a very passionate environment, being responsible for Front-end and Back-end development. You will perform development and day-to-day maintenance on large applications. You will get multiple opportunities to work on cross-system single-page applications.
<b>KEY RESPONSIBILITIES</b>	<p>Responsibilities</p> <p>Full stack development: Utilize extensive experience in full stack development, with a strong focus on .NET Core and ReactJS. Design, develop, and maintain scalable and high-performance web applications. Microservices</p> <p>Architecture: Architect, implement, and maintain microservices-based solutions, ensuring modularity, scalability, and flexibility. Collaborate with cross-functional teams to define and implement microservices best practices.</p> <p>API Gateway: Design and implement API gateways to facilitate secure and efficient communication between microservices. Ensure the API gateway is optimized for performance, security, and ease of use.</p> <p>Message Queue: Implement and optimize message queue systems for asynchronous communication between microservices. Troubleshoot and resolve issues related to message queue processing and reliability.</p> <p>DevOps Integration: Implement DevOps practices to streamline the development and deployment processes. Collaborate with DevOps teams to ensure continuous integration, delivery, and deployment pipelines are efficient and reliable. Technical Leadership: Provide technical leadership and mentorship to junior developers. Collaborate with architecture teams to align development efforts with overall technical strategy.</p> <p>Code Quality and Testing: Enforce coding standards and best practices to maintain high-quality code. Implement and advocate for automated testing strategies to ensure robust and reliable applications.</p> <p>Collaboration: Collaborate with cross-functional teams, including product managers, UX/UI designers, and other developers, to deliver integrated solutions. Participate in Agile/Scrum methodologies to deliver features iteratively.</p>

	Continuous Learning: Stay updated on the latest technologies and industry trends, incorporating new tools and practices into development and DevOps processes
